JOB APPLICATION MANAGER

Main Developer / Apr 2022 - Present

dev.azure.com/saigkill/JobApplicationManager

Job Application Manager is a simple solution for writing job applications. Using LaTeX, you can produce, compile, and send beautiful documents directly within the app. Job Application Manager also allows you to search a job, build the application stuff and manage the current status of submitted applications. For searching for a job currently the german job agency API is implemented. Users only need a Windows 10 computer and a basic knowledge of LaTeX---all other dependencies are bundled by the release.
